

UKNEST SCHOLARSHIPS £3000

UKNEST (www.uknest.org) exists to develop and sustain the vision and implementation of a world-class naval engineering, science and technology intellectual base in the UK. It provides a forum for the UK's professional naval engineering, science and technology community through which to address issues of common concern, fostering specific professional development needs, and giving a focal point for interaction with, and influencing the wider Government and industrial community.

As part of its work, UKNEST is offering 3 undergraduate scholarships to students studying for future employment in the sector and who are members of IMarEST or RINA. Scholarship benefits per student are:

- Bursary of £3,000 per annum (£1,000 per term)
- Mentoring from a UKNEST member organisation
- Access to a UK NEST member organisation to support your studies

To apply:

- Please e-mail an essay (500 words max) to Technical@imarest.org, setting out your understanding and supporting your desire to work within the UK naval engineering, science and technology sector.
- Also include contact details, CV, IMarEST/RINA membership number, course and year of study in Autumn 2012, university and a reference letter from an academic staff member confirming you are on track to successfully complete your studies.

Applications must be submitted no later than the end of August 2012.

All applicants will be notified of the final result and successful applicants will receive the first instalment of the bursary during the 2012 Autumn term. The bursary will be awarded to one student entering their second year of study, one student entering their third year and one student in their final year.
